

## BLACK By Design

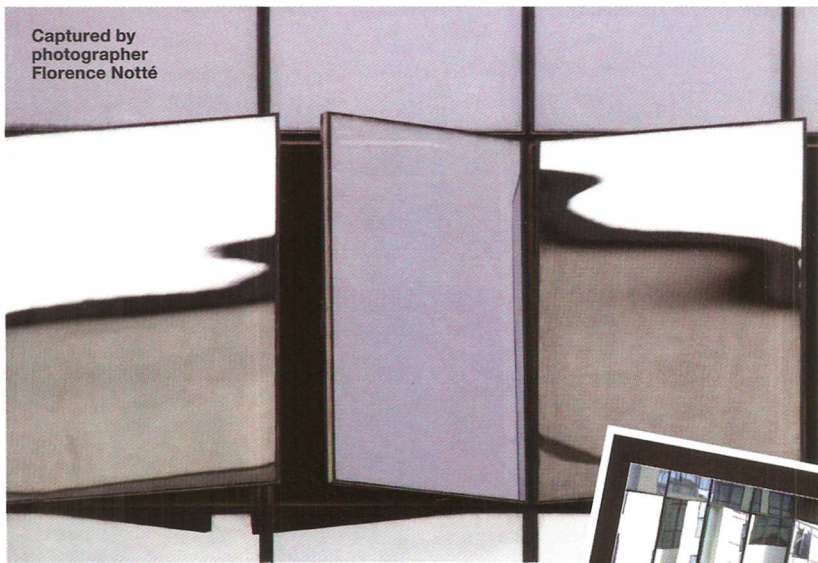

Walking away with the Good Design Award 2009, the Porsche Design P'9522 Black Edition offers a blend of art and engineering. The handset casing combines matt black anodised aluminium and

black mineral glass as "Black is the colour of Porsche Design," explains Dr Juergen Gessler, CEO Porsche Design Group. The fingerprint-reading sensor enables snappy shortcuts such as swiping the right thumb to call home or the left little finger to set the alarm. The limited edition handset is available exclusively at Porsche Centre Singapore and by invitation only to Porsche car owners. Visit [www.brandlab.com.hk](http://www.brandlab.com.hk)

## Urban Reflections

Following her last exhibition in Singapore at the Art Loft Gallery, French photographer Florence Notté has published an 84-page coffee table book entitled *Urban Reflects*.

The book is an artistic tome filled with images of Singapore in a style influenced by the Cubists and British Pop artists, in particular, David Hockney. Having exhibited in both Paris and Singapore, Notté captures the beauty of reflections, textures and shapes found in modern buildings on the city streets. The photographer has been awarded by the French Federation of Photography for a series of pictures in which paintings and photographs echo each other.
